

GEIST™

MOVEMENT CHEAT SHEET

While gathering chips to capture your Geist, you can simplify your movements by staying within a single triangle on the board, and use this cheat sheet. When you are close to obtaining the lure of the Geist, navigate towards its headstone, picking up the last few chips you need along the way to minimize your moves.

Due to the symmetry of the board, this cheat sheet works anywhere on the board for the big numbers such as 20, 15 and 10. For example, since a 20 can land you on a 15, it can land you on any 15 on the board. However, a 3 can only land you on a 15 that is 3 steps away.
